

4th PARTNERSHIP MEETING on Career Rocket

The last meeting of Career Rocket international team happened on May 9th 2019 after the International Conference in Zagreb. The partners shared the results achieved in the four countries. We agreed unanimously that despite of the specific political environment in Bulgaria, Greece, Croatia and Romania the project rose a lot of interest and curiosity. It was successful and provoked a lot of discussions, thoughts and changes of the attitudes of the different target groups and audiences – the teachers, the parents, the students and the entire society.

A guest to the meeting was the external evaluator of the project. Mrs. Todorova shared her general impression of following the project activities and of the international conference and she held some in depth interviews with members of the partners teams.

The partners left the meeting with best wishes for a successful closure of the project and future cooperation in the region and with the hope that the project results will be sustainable.

The Career Rocket will fly up in the future!
